

This comprehensive Core Skills training is designed to help you acquire a brand-new skill, even if you have no prior experience.

This course is designed with the aim of providing attendees with the knowledge and skills to operate a **Formlabs SLA system**. This will course will cover all of the essentials required to print successfully with resin printing, understanding the technology, its application and design guides to utilize the capabilities of the Form 3+ and Form 3L.

Participants will partake in hands-on aspects of the course including preparing files for printing on the SLA process, post processing stages and troubleshooting print quality issues. Upon completion participants will be confident in designing, printing and post processing for the SLA process.

About the tutor

Embark on an extraordinary journey of professional growth with Inspire 3D's renowned expert, Paul Quinn. With an exceptional career spanning six years, Paul has immersed himself in the dynamic realm of additive manufacturing, excelling in diverse roles such as R&D, Applications, and Training. His extensive expertise encompasses a comprehensive understanding of all cutting-edge technologies, coupled with hands-on experience in operating and maintaining a successful 3D printing business. As an Ultimaker Certified Trainer and Technician, as well as an esteemed Autodesk Fusion 360 instructor, Paul possesses the unrivaled ability to guide you towards mastery in this ever-evolving field. Don't miss the chance to learn from the best in the industry and catapult your professional journey to unprecedented heights. Enroll in our exclusive training course today and unlock limitless possibilities with Inspire 3D and Paul Quinn.
