

Our Foam Free Sustainable Flower Course has finally launched.

We have worked long and hard on this program to make sure the designs worked commercially in a commercial setting. We tried and tested many mechanics and give you our honest opinion on using them.

As a commercial flower school it is our responsibility to train the future florists in our industry sustainable techniques and mechanics that can also be sustainable in their business in order to pay a sustainable wage and run a financially sustainable business.

We know there are so many mechanics now available to us in the industry and by joining this program and being made a member of our Foam Free Sustainable Bloom Room, we can all share and keep ahead of trends and new innovation in foam free and sustainable techniques.

The Structure of our Foam Free Sustainable Course

Your Foam Free Sustainable Course is a 4 week Program from the start date

Per-Recorded Step By Step Tutorials that you can watch 24/7 for 365 Days.

Bloom Room Access - You will join our now famous Bloom Rooms - this Foam Free Sustainable Bloom Room will be a safe place to discuss your foam free concerns, to network with fellow florists on the same program as you & to post any questions or techniques you have come across. The Bloom Room opens on Day 1 of your program and will be monitored by your tutors for 4 weeks, Monday to Thursday. There will be 2 live classes each week where we can all catch up with each other.

What's App Support: Like all our programs we offer you 1-2-1 what's app support to help you and advise you when you try any of the designs from the program. You will have what's app support Monday - Thursday 9am - 3pm for the 4 weeks of your program.

Certificate: For those who do wish to be certified will be required to submit 5 designs before the last day of the program. More details on this will be included in the program and in the Bloom Room.

Sundries/ Supplies & Kits: As part of this program we do not supply sundries and supplies. We do provide you with links and discount codes for many suppliers where you can decide which mechanic you wish to try or use.
